

**“We use Avira as the first line of defense against viruses.”**

**Bernd Gronemann-Habenicht,  
Commerzbank AG**

# **The Avira Business Bundle**

**for large-scale businesses**

## Big business.

[www.avira.com](http://www.avira.com)

The larger a company is, the more important is the topic of security. An attack by a hacker could cost not only money but also a good reputation. We have something to stop that from happening. **The Avira Business Bundle.**

## Large-scale protection for big businesses.

Companies that want to stay on the safe side with their more than 100 PCs, data servers and e-mail communication are best advised to protect themselves with the Avira Business Bundle. The integrated spam protection provides order in email inboxes and saves time that one would otherwise spend sorting out annoying spam. Last but not least, the security solution can be managed network-wide with a few clicks with the Avira Security Management Center.

You can also benefit from an intelligent all-around solution made in Germany. Avira reliably protects companies of every size against malware. The trust we have gained from sensitive branches of businesses such as banks and insurance companies confirm the years of high quality of our TÜV-certified virus detection.

## Trust is good. Avira is better.

The Avira business bundle protects desktop PCs, data servers, and email traffic from the flood of viruses that gets bigger every day. With Avira AntiVir Professional, Avira AntiVir Server, Avira AntiVir Exchange plus AntiSpam, Avira Security Management Center, and over 20 years of experience in IT security, Avira keeps your company well-protected against the schemes of cybercriminals.

## Optimal protection. Efficient management. Quick updates.

- ▶ A professional security package for medium-sized and large networks
- ▶ Leading detection rates and elimination of viruses, worms, trojans, adware, spyware, phishing, and other malware
- ▶ Innovative AHeAD (Advanced Heuristic Analysis and Detection) technology for detecting unknown or quickly changing attacks
- ▶ Avira Rootkit Detection (protection against system-manipulating processes) including repair functions
- ▶ Real time monitoring of all data access and archives with an on-access scanner as well as an on-demand scanner for manual and scheduled scans
- ▶ Archive detection with selection of the archive types to be examined and adjustable recursion depth and scanning of compressed files in real time
- ▶ Examination of email traffic in order to detect infectious content directly on the server, checks every incoming, outgoing and internally sent email in real time
- ▶ Identification of spam emails and detecting of potentially dangerous content in them
- ▶ Real time monitoring of the HTTP-based Internet data traffic on the desktop with automatic blocking of phishing and malware URLs
- ▶ Quarantine for secure isolation of infected or suspicious files
- ▶ Individual configuration at the user level
- ▶ Constant examination of the product and module status – irregularities and deviations from the norm are reported immediately
- ▶ Central control of scans and updates as well as network-wide administration with the Avira AntiVir Security Management Center (SMC)
- ▶ Planning and automation of routine tasks for the entire security environment
- ▶ Event manager for direct monitoring of the current system security level
- ▶ Comprehensive notification and reporting functions with freely definable rules
- ▶ Finely tuned user management including password and general / group-based rights allocation
- ▶ SSL-encrypted connections between SMC and administered computers
- ▶ Extremely small, bandwidth-saving updates of the detection pattern database and program
- ▶ Optional automatic update of all core components and all product packages via the SMC-integrated Internet Update Manager. Freely definable update intervals and test mode for preliminary testing of updates

## The Avira Business Bundle. So much is certain:

### Optimal protection

- ▶ Integrated cross-platform all-around protection against malware and spam
- ▶ Avira's reliable and proven state-of-the-art technology with leading detection rates that have received multiple awards
- ▶ Avira reacts quickly to new dangers with its own malware research center

### Low cost of ownership

- ▶ Extremely efficient administration with working processes that can be automated as well as central management
- ▶ Intuitive operation without a steep and expensive learning curve
- ▶ All licenses include free updates, upgrades, and installation support

### Easy installation and management

- ▶ Problem-free integration into your IT architecture and simple arrangement of the security environment
- ▶ Complete solution with central installation, configuration, and monitoring including updates of all components
