

The MIMESweeper product family from Clearswift is a leading security software tool for email and/or the Internet. It represents one of the most highly developed and most versatile solutions in this field. With Avira AntiVir MIMESweeper you combine MIMESweeper for SMTP, Exchange, Domino or Web with powerful, efficient virus and malware protection.

Email content and Internet security solutions for the Clearswift product family

Avira AntiVir MIMESweeper

Solutions

- ▶ Avira AntiVir MIMESweeper
 - ▶ MIMESweeper for SMTP
 - ▶ MIMESweeper for Domino
 - ▶ MIMESweeper for Exchange
 - ▶ MIMESweeper for Web

THE CHALLENGE

The rapidly growing exchange of data via email and the Internet makes great demands on corporate security. Malware attacks can jeopardize business processes, damage reputations and lead to liability claims, costs and decreased productivity. Companies are therefore well advised to filter and analyze data traffic and also define rules that minimize potential risks from the outset. The MIMESweeper product family from Clearswift offers a comprehensive approach in this field. This rule-based content and security solution supports companies in observing internal security regulations. With relevant interfaces it is designed to monitor incoming and outgoing data traffic and ward off dangers connected with email and Internet use. Integration of a virus and malware scanner ideally suited to MIMESweeper protects IT systems and processes and reliably ensures secure electronic corporate communication without compromises.

THE SOLUTION

With Avira AntiVir you have direct access to the recognized IT security expertise of Avira and extend your MIMESweeper solution with a technology that is reliable, proven and at the same time innovative. It combines mutually complementary scanning methods, identifies and localizes viruses even in complex formats – archives, email/mailbox formats, runtime zip programs, Office files – and is capable of repairing infected files. Thanks to multi-threading, the solution covers several programs, processes or threats simultaneously when scanning, which saves valuable RAM resources and contributes to the enormous performance of the scanner. After installation, Avira AntiVir can be administered directly from the configuration of the MIMESweeper products and can be used immediately to handle protection and security tasks. Use of the MIMESweeper logging, reporting and alert system ensures an overview of the status and current security situation at all times. An alert generated by the system can be linked to specific, automatically started actions.

FUNCTIONS

Uncompromising protection: ▶ Integrated solution for the protection against viruses, worms, Trojans as well as spyware, adware and dialers. ▶ Examination of the complete data traffic within MIMESweeper
 ▶ Extremely reliable, many times awarded detection. ▶ Recursive scanning of all email attachments, even of those in compressed form (archives). ▶ Protection through updates without system interruption.

Perfect integration: ▶ Fast, trouble-free installation ▶ Easy configuration and administration via the MIMESweeper user interface. ▶ Reporting function within MIMESweeper.

Extremely high performance: ▶ Fast and resource-saving search engine. ▶ Immediate start of all scans through direct integration as system library without the necessity to reload program modules. ▶ Faster access to the virus database as it is not necessary to read in and initialize with every scan procedure. ▶ Discharge of the RAM by using one single copy of the search engine with all scans.

Fast updates: ▶ Extremely small, bandwidth-saving updates of virus definitions through incremental VDF update. ▶ Fast, seamless protection through updates without system interruption.

YOUR ADVANTAGES

Optimum security

- ▶ All-round protection through complete integration in the MIMESweeper products
- ▶ Reliable, extremely performing AntiVir technology with leading multi-award-winning detection performance
- ▶ Fast reaction to new dangers through in-house malware research centers
- ▶ Time saving and therefore increased security through early outbreak detection

Low costs

- ▶ Extremely low administration costs
- ▶ Guaranteed and attractive conditions
- ▶ No double licensing of the virus protection necessary when using MIMESweeper for SMTP and Web

High investment security

- ▶ Fast, resource-saving scanning technology which reduces the load on servers and networks. Existing systems can be used for a longer time
- ▶ Transparent licensing designed to meet requirements without hidden costs
- ▶ Free platform change to new or alternative operating systems

Avira AntiVir MIMESweeper

AVIRA – TECHNOLOGY FOR YOUR IT SECURITY

Fast and resource-saving: The Avira AntiVir virus and malware detection technology has proven itself as one of the fastest on the market. This enormous performance is based on the low RAM requirement of the program. Even large quantities of data can be scanned in an extremely short time due to multi-threading (Windows) or multi-daemon (UNIX) capability. By adapting the scope and intensity of the scan to individual requirements or technical circumstances, performance can be increased even further.

Leading detection rates: Avira solutions regularly win awards for their speed and high detection rates. These are achieved by combining leading scanning and detection methods with an innovative heuristic. Fast reaction times to new dangers and updates of signature files several times a day ensure that your protection is always up-to-date.

Cross-platform protection: Avira AntiVir security solutions are available for Windows and conventional UNIX-based platforms. Irrespective of the operating systems you use – with Avira AntiVir your important data in the company is and remains ideally protected against malware.

ABOUT AVIRA

Avira is a worldwide leading supplier of self-developed security solutions for professional and private use. With more than twenty years of experience, the company is one of the pioneers in this field.

The security expert has several locations in Germany and partnerships in Europe, Asia and America. At its headquarters in Tettngang near Lake Constance, Avira is one of the region's largest employers with more than 180 employees. Worldwide more than 250 persons are employed and their work regularly wins awards. Avira AntiVir Personal, used by millions of private users, represents a significant contribution to security.

Avira's national and international customers include renowned corporations listed on the stock exchange but also educational institutions and public authorities. In addition to protection of the virtual environment, Avira also provides for more protection and security in the real world by supporting the Auerbach Foundation. Established by the founder of the company, the Auerbach Foundation promotes charitable and social projects as well as the arts, culture and science.
