

There are many cybercriminals out there.
Keep ignoring them, we'll keep them out.

We monitor and analyze your cybersecurity and will warn you about any threats and then act proactively to resolve them.

CYBEROO offers a fully managed **MDR** service (Managed Detection & Response) that combines Artificial Intelligence and Machine Learning with the skills of over 60 cyber security specialists. It's not a technology for one service, but a solution that combines these two aspects into a 24h operation, creating a supply chain without any weaknesses.
To protect you against the most advanced cyber threats and smartest cybercriminals.

We handle your cybersecurity. Day and night. 365 days a year.

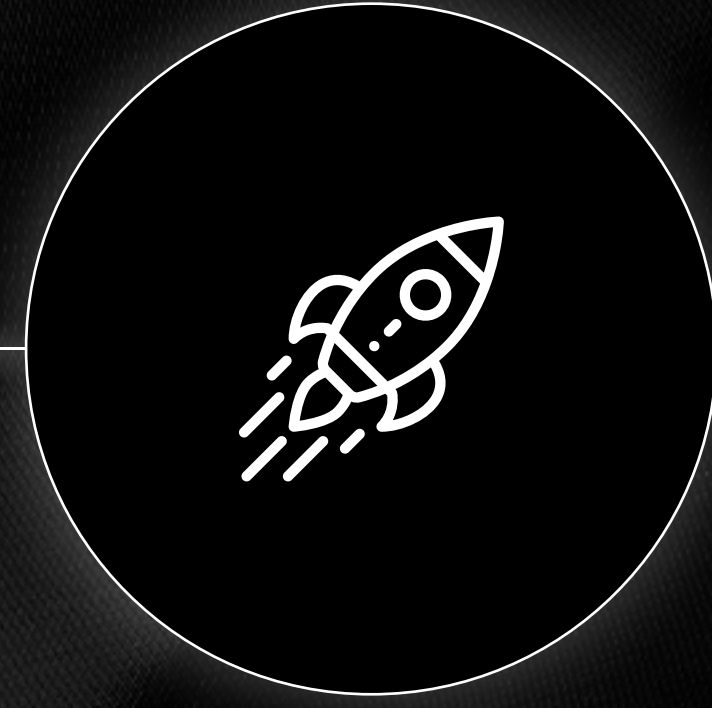

DETECTION 24/7

Our MDR system monitors and analyzes your cybersecurity 24/7. Because cybercrime never sleeps and neither do we.

ANALYSIS 24/7

Our team of Specialists studies any potential anomalies detected by our systems to identify any possible type of threat.

RESPONSE 24/7

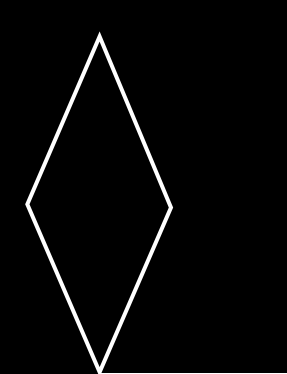

If a threat is detected, we take immediate action, 24/7, to resolve the problem as quickly as possible.

IN ONE SINGLE SERVICE

CYBER
SECURITY
SUITE

WE DON'T LEAVE ROOM FOR GRAY AREAS.
WE PROTECT YOU FROM INTERNAL AND EXTERNAL THREATS.

CY

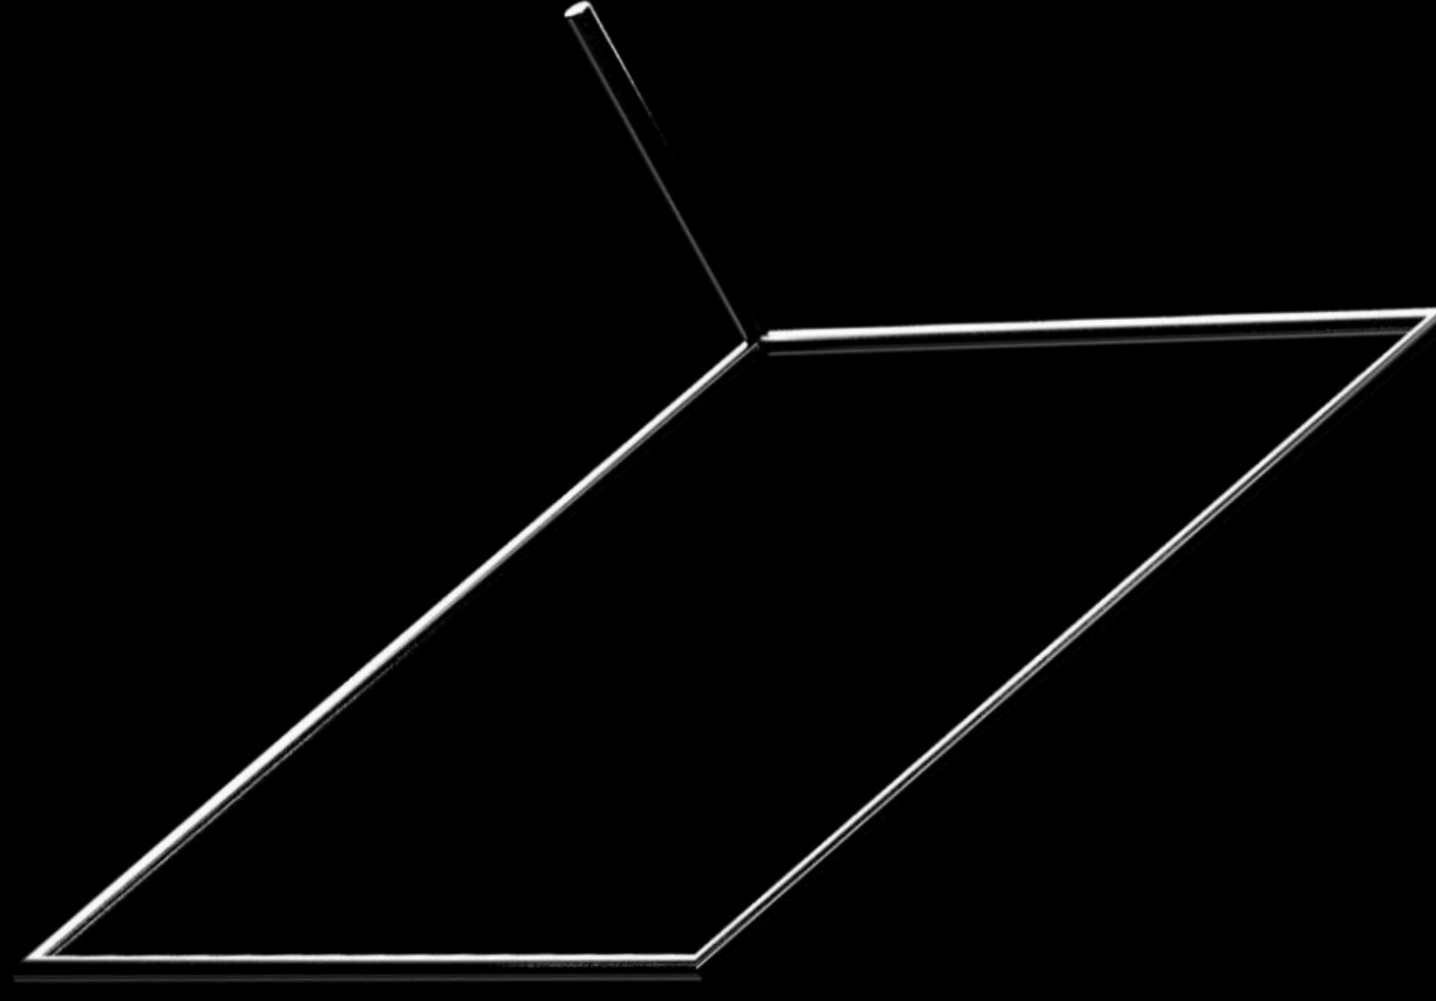

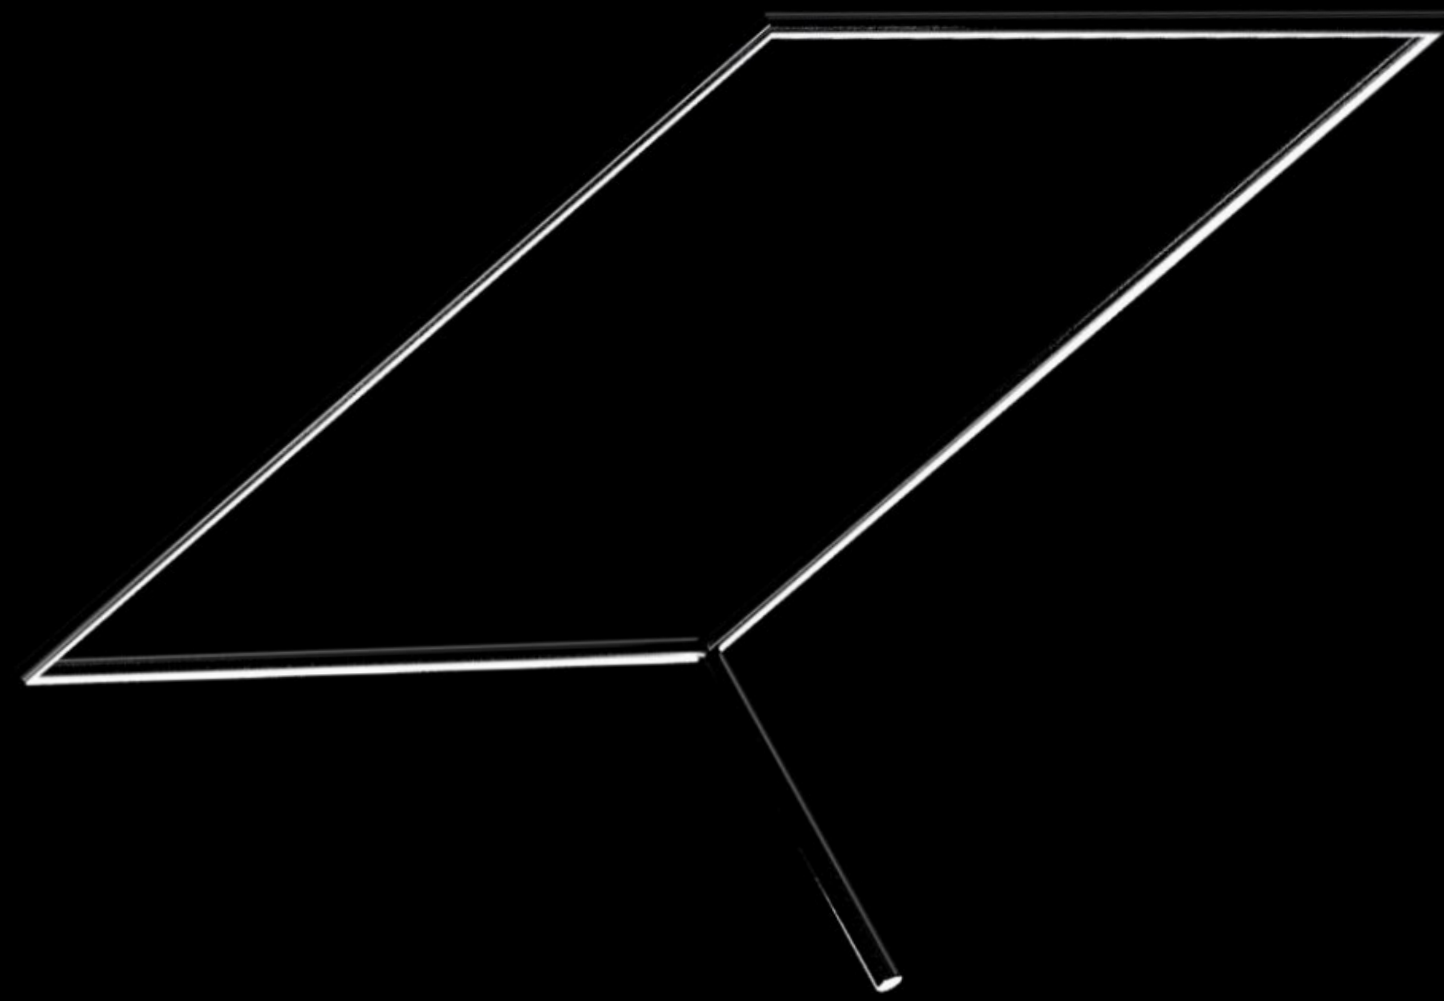

We manage your internal security

We integrate and monitor all existing services and systems within your company IT ecosystem to protect you on all fronts.

CSI

Protects you from external threats

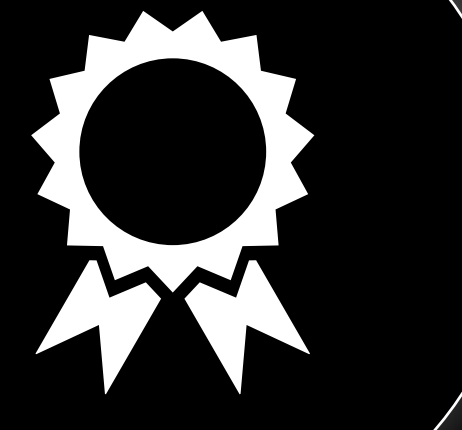

Our ethical hackers will work undercover in the world of the deep and dark web, to identify possible threats and protect your boundaries.
