

Product overview Greenbone Security Manager

| | | | |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Large Enterprise IT Control of upto 50 scan sensors*</p> <p>5,000 - 50,000 IPs*</p> <p>GSM 5300: 3,000-30,000 IPs*, upto 30 scan sensors*</p> | <p>0-24 Port GbE Base-TX 0-24 Port GbE SFP 0-6 Port 10GbE XFP</p> <p>Redundant: HDD, Power, Fans Hot-Swap: HDD, Power, Fans Greenbone OS with SSH, OMP, HTTPS, Backup</p> |  Price on application |
|  | <p>Medium to large enterprise IT Control of upto 12 scan sensors* Major branch offices</p> <p>500 - 10,000 IPs*</p> <p>GSM 500/510: 500-5,000/6,000 IPs*, upto 10/12 scan sensors*</p> | <p>4 Port GbE Base-TX 4 Port SFP</p> <p>Greenbone OS with SSH, OMP, HTTPS, Backup</p> |  Price on application |
|  | <p>Small and medium enterprise IT Medium branch offices Scan sensor for GSM from GSM 500</p> <p>50 - 500 IPs*</p> | <p>4 Port GbE Base-TX</p> <p>Greenbone OS with SSH, OMP, HTTPS</p> |  Appliance: from 2,990 €** Subscription: 1 year: from 2,700 € 3 years: from 6,480 € 5 years: from 9,450 € |
|  | <p>Scan sensor for GSM from GSM 500 Small branch offices</p> <p>20 - 300 IPs*</p> | <p>4 Port GbE Base-TX</p> <p>Greenbone OS with SSH, OMP</p> |  Appliance: from 2,490 €** Subscription: 1 year: from 2,100 € 3 years: from 5,040 € 5 years: from 7,350 € |
|  | <p>Virtualised environments Special purpose</p> <p>20 - 300 IPs*</p> <p>Only in combination with a project solution</p> | <p>OVA VM Snapshot 1 (virtual) Port</p> <p>Greenbone OS with SSH, OMP, HTTPS</p> |  Virt.Appliance: from 390 €** Subscription: 1 year: from 1,900 € 3 years: from 5,016 € 5 years: from 7,600 € |

* effective number depends on scan pattern and scanned systems

** Prices valid for Germany, from Feb. 15th 2012

The **Greenbone OS** equips the Greenbone Security Manager appliances with a comprehensive and powerful basis.

The main elements of Greenbone OS are the base operating system, a administrative interface and the scan applications.

Depending on the GSM product, varying hardware-specific features are supported.

The **Greenbone Security Feed** is our foundation technology. It is a stream of little procedures to detect known and potential security vulnerabilities. These procedures are executed by a Scan Engine and can check any device connected to your network.
